

Independent Practice Research Symposium Agenda

Topic: Creating a Successful Clinical Research Center in Independent GU Practices: The Challenges and Solutions

Chairs: Laurence Belkoff DO, FACOS & Gordon Brown, DO

Date & Time: Saturday, May 4, 2024 - 1:00pm - 5:00pm CT

Location: Henry B. González Convention Center, Room 217D

Symposium Goal: This symposium will focus on how to do clinical trials in an independent, community, or private practice setting. This symposium will also help residents understand there is opportunity to grow collaborative relationships amongst independent, community, or private practices.

Learning Objectives:

1. Demonstrate the components of an optimized relationship between leaders in independent practice, academia, and biopharma and device industry.
2. Understand how to appeal to underrepresented minorities in clinical research trials.
3. Identify how artificial intelligence is applied and transforming clinical research.
4. Apply the necessary tools to write a manuscript that will be successfully published.
